# SENDING STONE
GUIDE

## DESIGNING

Below, you will find a link to a Canva template. Canva is an online graphic design tool. You will be asked to create an account, but you do not need to pay for a subscription to use Canva or this template. You may have to "unlock" some elements (top right menu) if you have difficulty editing them.

Like any online tool, Canva can be a little funny at times, even when it works perfectly on my end. So please feel free to message me with any questions.
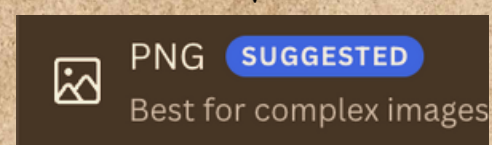

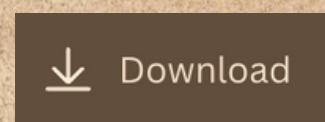

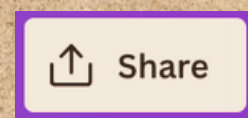

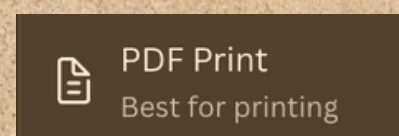

PRINTING

When downloading your newsletter to print, you will need to click "Share" and then "Download" from the top right menu. To print on your own decorative paper (like paper that is already faux-aged for example) be sure to choose the "transparent" pages- with the white background.

".PNG" or ".PDF PRINT" are the recommended file types. You can also order prints through Canva directly. (Parchment background page recommended).
